

Vip Camilla became the first resident at the Rudnevo site of Technopolis Moscow SEZ in August 2023. We chose the Moscow SEZ because it offers excellent conditions for development. There are tax benefits, excellent infrastructure and easy access to transport options.

Another important aspect is the existence of the free customs zone, thanks to which we can import raw materials and equipment without significant customs duties and bureaucratic hurdles. This streamlined logistics process grants us access to high-quality materials and technologies without incurring additional expenses, thereby enabling us to reduce the cost of our products."

UCHAR OSMAN
Chief Executive Officer of Vip Camilla

It is a significant and prestigious achievement for us that since 2024, CARS, JSC has been a resident of Technopolis Moscow SEZ. This SEZ is the top-rated technopolis that provides residents with a competitive advantage and fosters their successful growth.

Special economic zones serve as a hub for entrepreneurs, scientists, educational institutions, and government agencies, creating a unique ecosystem. Within this environment, a company can collaborate with other residents, find new partners and investors, and attract top-notch talent.

Ales Loginov
Chief Executive Officer of CARS

INFRASTRUCTURE FOR RESIDENTS

Technopolis Moscow SEZ provides all the essential facilities for thriving business growth. Here you can either build your own facilities or rent ready-made space. The SEZ offers a variety of facilities, ranging from manufacturing and office spaces to retail areas, facilitating the seamless coordination of all business operations within a single location.

All the facilities of the SEZ are situated in a location that is easily accessible by public transportation, making it convenient for employees, partners, and clients to reach them.

The following infrastructure facilities are available for residents:

- Logistics center:
 - Temporary storage warehouse of closed type – 650 m²
 - Open area – 1,650 m²
- Free connection to utilities (power supply, water supply, wastewater disposal, heat supply)
- Clean room units for microelectronics and biotechnology
- Shared-use centers with high-tech equipment
- Office and commercial space for service and other companies (showrooms, cafes, etc.)
- Class A halls for press conferences and business forums:
