

EXPORT ACTIVITIES OF RESIDENTS

9 customs control zones
opened in the SEZ

>30 foreign delegations
visited the SEZ

The free customs zone regime is one of the key advantages for residents of Technopolis Moscow SEZ in organizing export supplies. This regime allows for a substantial decrease in customs and VAT expenses, which in turn provides additional funds for the expansion and upgrade of manufacturing facilities. In 2024, nine new customs control zones were established in the SEZ, with a total of 23 customs zones in operation.

The capital city's SEZ is actively bolstering international connections by showcasing local products at international exhibitions and facilitating meetings with foreign visitors. In 2024, more than 30 delegations from various countries, including China, India, Iran, and Saudi Arabia, visited the SEZs and resident enterprises. These visits pave the way for fresh prospects in the realm of commercial and economic interactions with our allies, thereby bolstering the standing of Russian enterprises on the global stage.

Volume of residents' proceeds from exports as a cumulative total throughout the existence of the SEZ, RUB billion

FINANCIAL PERFORMANCE OF RESIDENTS

Revenue

top-3
SEZ residents by revenue

In 2024, SEZ residents received RUB 198 billion in revenue, up 44.6% year-on-year. The largest contributors were microelectronics companies, their revenue amounted to RUB 75 billion. The rise in revenue for microelectronics companies is attributed to the widespread replacement of foreign telecommunications devices with locally produced equipment manufactured in Moscow.

Revenue structure of residents by sector

Annual revenue of SEZ residents, RUB billion

- Microelectronics, optics, robotics and industrial automation
- Medical technologies and pharmaceuticals
- Information and communication technologies
- High-tech production and energy-efficient technologies
- Advanced materials and nanotechnology
- Energy efficient technologies

Investments

top-3

SEZ residents by investment

In 2024, investments of residents that localized their operations at the SEZ territory grew by 42.9% compared to 2023 and amounted to RUB 70.8 billion. Since the establishment of the SEZ, residents have invested a total of RUB 235.8 billion. This growth was facilitated by the presence of advanced infrastructure, easy transportation, and ample

opportunities for industrial collaboration. A crucial aspect is the appealing array of tax incentives, which can substantially decrease expenses and enhance the profitability of projects. These factors collectively contribute to minimizing investment risks and boosting profitability, making SEZs an attractive option for businesses.

Payments to budgets

top-3

SEZ residents by volume of payments to budgets

In 2024, SEZ residents received more than RUB 8.6 billion in benefits, including tax incentives, benefits on insurance premiums and customs payments. Simultaneously, the aggregate sum of payments made by residents to budgets of all tiers and off-budget funds reached RUB 25.6 billion or RUB 76.6 billion over the entire existence of the Moscow SEZ. This underscores the efficacy of the incentives offered – by alleviating the burden on businesses, they foster the rise in revenue and, consequently, tax inflows. This balance stimulates economic development and strengthens the partnership between government and business.
